

ROBERT MATHISON

BOYS SOCCER

Soccer has been a lifelong passion for Robert Mathison, ever since his early days controlling the midfield in a youth league. The game instilled in him a deep appreciation for strategy, endurance, and the camaraderie that makes soccer more than just a sport. Now, as a coach, he strives to pass that same passion on to his players, helping them develop both their technical skills and their character through teamwork, discipline, and perseverance.

He currently teaches fifth-grade science at Jacksonville Classical Academy and holds a Bachelor of Science degree in Space Studies with a concentration in Astronomy. His passion for education and teamwork extends beyond the classroom—he has worked as a public outreach and science communication intern for NASA’s Lucy mission and has served as a Student Success Advisor and Teaming Mentor for NASA’s L’SPACE Mission Concept Academy and Proposal Writing Academy. In these roles, he has guided diverse teams of students, helping them collaborate effectively to overcome challenges and achieve shared goals. His primary goal as a coach is to help players become the best version of themselves both on and off the pitch, building confidence, resilience, and a lifelong love for the Beautiful Game.
